Cited Reference Searches in Web of Science

If you have a citation for a document, and you want to know if anyone has cited it, use Web of Science’s Cited Reference Search.

Select **Web of Science (Citation Indexes)** from the Databases by Title list:

Click on the **Cited Reference Search** link on the Web of Science search screen:

Fill in the form with as much information as you have, and click on the Search button:
There are usually two ways to find the articles that cited the original article from the results list:

1. Check the box in the **Select** column next to the matching result(s), and then click on **Finish Search**:

   ![Cited Reference Search](image)

   **Step 2:** Select cited references and click "Finish Search."

   Hint: Look for cited reference variants (sometimes different pages of the same article are cited, or papers are cited incorrectly).

   ![Cited Reference Index](image)

   This will bring up the records for the articles in Web of Science that cited the original article:
2. If the article is available in Web of Science, click on the View Record in Web of Science link:

You will see the original record. The citing articles will be available in the right-hand column.
